Projects

1. Medical-Gene Data Analysis

- Analyzed the Medical data with medicines and Ingredient
- Data Extraction and web Scrapping for Medical-Gene Data
- Used NLP & Python for data extraction and preprocessing
- Designed a responsive Dashboard using Power BI

2. Scientific Lab Instrument Website

- Built a web page for Scientific lab & Other Lab Instruments
- Admin Panel to add, edit, delete products and approve requests
- Used Flask and POSTGRE SQL for backend and database handling
- Designed a responsive UI with HTML5.0, CSS3, and Next.js

3. Data Science Job Salary Analysis Dashboard

- Built a fully functional Data science salary prediction dashboard
 - Job Salary Data extraction using python
 - Pre-processed and understand the data using DAX and Power Queries
 - Interactive Dashboard using Advanced Excel, Power Pivot & M Language
-

Skills & abilities

1. Technical Skills

- Excel & Advanced Excel
- Python & Libraries
- SQL (MY-SQL, POSTGRE-SQL, SQLITE)
- Power BI
- Next.js, Tailwind CSS
- DAX & Power Query

2. Soft Skills

- Critical Thinking
- Analysis (Data, Business)
- Leadership
- Time Management
- Communication

Certifications

1. AI Tools Workshop (Be10X)
2. Introduction To Cyber Security (CISCO Networking Academy)
3. Quantum Computing Certified (63.61%) (CDAC & IIT Roorkee)
4. Advanced Excel & DAX (Luke Barousse)
5. Python Essentials & Advanced (CISCO)
